NEXTGEN LOTTO

Lotto Management System – New York City

Overview

NextGen Lotto is a user-friendly lotto management application designed to streamline store operations, improve inventory accuracy, reduce processing time, and enhance operational efficiency.

Key Features & Benefits

- Provides real-time On-Hand Ticket Summary with active and idle inventory visibility.
- Prevents theft by identifying missing tickets and unbalanced accounting automatically.
- Sends instant alerts through SMS and email notifications for inconsistencies.
- Reduces manual paperwork and saves operational time significantly.
- Offers detailed reports and analytics for business performance tracking.
- Minimizes human errors through automated validation and calculation indicators.
- Supports continued updates including iOS and Android compatibility.

Operational Advantages

- Daily processing time reduced to approximately 2–5 minutes.
- Improved ordering decisions through analytics and inventory tracking.
- Enhanced employee productivity and operational transparency.
- Supports multi-store operations with centralized tracking.

Estimated Savings

The system estimates annual savings exceeding $10,000 through error minimization, reduced processing time, and improved operational efficiency.

Pricing Information

- Flat monthly pricing suitable for all business sizes.
- Monthly Subscription: $59 per month.

- First month offered free of cost.
- Includes free barcode scanner support.
- Supports unlimited scratch-off and terminal ticket sales tracking.
- Provides 5% discount for multi-store businesses.
